This Report is based on unaudited data presented by licensees and submitted in a format prescribed by the Department of Corporations and licensing statistics. The reader should be aware that the data contained herein is primarily statistical in nature. Certain statistical data compilations required of licensees have been modified to provide more meaningful statistics. To assist in comparing data from prior years, certain statistical data is included in the charts on pages 9 through 15.

Upon reviewing the data, the report demonstrates a steady decline in the number of California deferred deposit licensed locations. In 2006 there were 2,445 licensed locations, compared to 2,119 licensed locations in 2011. From 2006 to 2011 the number of licensed locations has decreased by 326. However, starting in 2009 the decline in licensed locations appears to be leveling off. Between 2009 and 2011 only 68 licenses were surrendered. The data also shows that, even though the licensed locations have decreased, the number of deferred deposit transactions and customers obtaining deferred deposits is steadily increasing.
